imtrad is a Web Design and Data Processing company specialized in Knowledge Management: translation and localization, creation, editing and maintenance of **web sites**.

imtrad offers databases' maintenance and backup solutions especially adapted to SME, as well as consulting and negotiations services with web and data processing suppliers.

imtrad can help you choose the best customized solution for your business, your aspirations and your budget. We favour the establishment of a trust relationship with our clients, always proposing open solutions (thus, reducing costs) in the limits of your budget.

Consulting and Web Development

Optimize your web site

Your web site is your window to the world, the first impression you give to your clients. It must be easy to use, pleasant to look at and well referenced by search engines.

Our know-how helps you create or evaluate your web site according to your needs :

- Information organization
- Navigation facilities
- Design
- Positioning techniques with search engines
- Optimizing your budget
- Reactivity and Rapidity
